Paper Plate Sun Craft

Items Needed:

2 yellow paper plates (or paint white ones yellow)

black construction paper

tacky glue

Scissors

Cut one paper plate in half.

Next, cut each half into half again two more times.

(You should end up with a **total of 8 equal pieces.**)

Arrange the pieces so they are evenly spaced around the other whole paper plate. This will make it a bit easier when adding the glue.

Next, add a bit of glue to the rim of each of the 8 pieces, and glue into place. You may need to hold each piece in place for a few seconds to allow the glue to take hold.

Finally, draw and cut out construction paper eyes and a mouth to add to your sun's face.
